Mouse & Speakers	Mouse Speakers/Earphones Required

• No non-standard software/plugin installation is required for the learner's environment.  
• Content creation requires an ActiveX plug-in inside Internet Explorer / Windows.

# Integrated eLearning Hosted Application Service Knowledge Deli

## Knowledge Deli

Empowering you to accomplish the eLearning solution you need

**Nugress Digital Knowledge Inc.  
(Developer & Service Operator)**

# Allowing Enterprises to Quickly Share Information in a One-Stop Easy-to-Understand Environment

5 points why "Knowledge Deli" helps organizations propagate their valuable know-how and power up their overall organizational efficiency

### POINT 1

#### Easy Installation & Operation

All tasks from content creation to system operation and management can be performed easily via a web browser. Also, because Knowledge Deli is provided as an application service, risks associated with installation and system maintenance are absent. Furthermore, technical know-how is not required to get your system up and running.

### POINT 2

#### Real Contents

Knowledge in the form of "intent" and abstract "notions" can be extremely difficult to communicate with text alone. Fortunately, Knowledge Deli allows for the attachment of video to existing content, and video excels at conveying such knowledge. This allows for more precise and efficient information propagation. Also, video integration provides for more real and life-live educational materials overall.

### POINT 3

#### Centralized Control

Because course progress of each individual learner is manageable from a central location, you can now stay organized and avoid searching around for scattered information. In addition to progress management from the standpoint of traditional eLearning, feel free to use Knowledge Deli to accomplish other forms of company knowledge management such as operational guidance, governance, etc.

### POINT 4

#### Multi-Web Browser Access

Learners do not require any web browser plug-ins (with the exception of the standardized Silverlight and Flash plug-ins for certain content), and can access how and where they please. Web browsers supported include Internet Explorer, Firefox, Safari, and Chrome, making it easier than ever for learners to jump right in from the environment of their choosing.

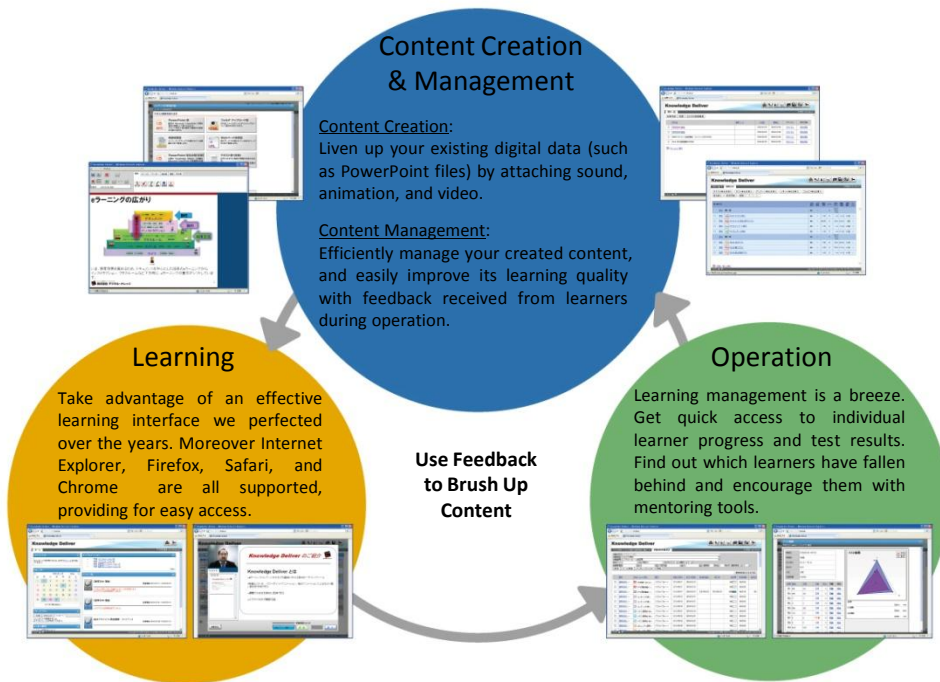

### POINT 5

#### Solid Support

If questions arise regarding the usage of Knowledge Deli, please do not hesitate to contact our support center. Rest assured that you can rely on our support team to help you out in time of need. Finally, we will keep you well informed about maintenance schedules, and the details of service upgrades, so you can benefit most from them.

## Increase Company Knowledge Distribution Efficiency

On top of standard learning management functionality present in a LMS (Learning Management System), Knowledge Deli adds content creation and content management functionality. Not only does Knowledge Deli provide all of the functionality necessary for an integrated eLearning solution, being an application service, it also allows for easy access and lets you get started right away. In addition to eLearning, Knowledge Deli can be easily applied to assist your company with other types of knowledge distribution and sharing as well.

## No Technical Expertise or Software Installation Required!

Knowledge Deli is provided as an application service. Therefore you won't find yourself saying things like, "Installation is confusing...", "System operation and maintenance is too complicated." Instead operators can stay focused on producing necessary content and distributing it to the learners that need it. In the case that specific functionality is not clear, our support center is available to assist you.

- Easy Access
- Effort-Free Operation
- Easy Web Browser Access
- Solid Support
